Georgia State University, Atlanta	Jan 2022 - May 2023
<i>Graduate Teaching Assistant</i>	
<ul style="list-style-type: none">Managed the grading of assignments and conducted lab sessions for cohorts of 50 undergraduate CS students for various courses. Clarified students' doubts about data structures in java & python.	
ZS Associates, India	Dec 2020 - Dec 2021
<i>Sr. Associate Consultant</i>	
<ul style="list-style-type: none">Led development of database search engine MVP end-to-end using Figma, Angular, and Apollo GraphQL, increasing query speed for varied data sources by 45%.Orchestrated frontend development of a design intelligence platform using React facilitating leadership to gain valuable insights into clinical trials faster by 35%.Facilitated knowledge transfer sessions for client teams, successfully onboarding client developers to the project and ensuring seamless collaboration between teams.Configured CI/CD pipelines on GitLab, and bitbucket for code reviews, unit/integration/e2e testing, and deployments.Formulated and executed comprehensive learning modules to mentor and onboard junior team members and interns within a 3-month timeline.	
ZS Associates, India	Mar 2018 - Dec 2020
<i>Associate / Software Developer</i>	
<ul style="list-style-type: none">Integrated single sign-on authentication and authorization feature in a data-sensitive web application for a UK-based pharma client, using Python, Angular, and OKTA.Implemented various visualizations – maps, timeline charts, custom bar charts – to effectively communicate insights and trends from clinical trials to leadership generating revenue of \$2.4M.Developed REST APIs with Flask and PostgreSQL to display learning insights, improving staffing efficiency by 15%.Pioneered angular packages for table and dropdown components, confiding business requirements and boosting development activity by 20%.Coordinated effectively in cross-functional teams to ensure timely delivery of the applications.	
Logiquad Solutions, India	Jun 2017 - Mar 2018
<i>Jr. Software Developer</i>	
<ul style="list-style-type: none">Contributed to publicly available websites - Trade Show News Network, LawhelpCA - Drupal CMS.Revamped website navigation by developing custom breadcrumbs module using JavaScript and PHP for intricate paths.	

PROJECTS

Task Manager – MEAN stack ([link](#))

- Developed a task manager angular app with a login feature using JWT to add, delete, edit, and manage tasks and task lists. Deployed application on Azure WebApp using GitHub CI/CD pipeline workflow.

Resume Builder – ReactJS, Bootstrap ([link](#))

- Built a react web application that takes user details in the form and creates a resume referencing a standard template.

Weather App – ReactJS ([link](#))

- Implemented a SPA using react hooks and integrated it with Weather API to search for a new city and display current, hourly, and daily forecast.
